Art Unit: 1652

DETAILED ACTION

Claims 1-92 are pending.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23, 40-41, 67-85 drawn to DNA, vectors, hosts cells, probes and expression of transaminase, classified in class 435, subclass 193.
- II. Claims 24-35, 64, 86-87 drawn to transaminases, classified in class 435, subclass 193.
- III. Claims 36-39, drawn to transaminase antibodies, classified in class 530, subclass 387.9.
- IV. Claims 42-55, drawn to methods of generating a variant polynucleotide, classified in class 435, subclass 440.
- Claims 56-60, drawn to a computer and computer readable medium,
 classified in class 712, subclass 1.
- VI. Claims 61-63, drawn to methods of computer analysis of polynucleotide sequences, classified in class 700, subclass 90.
- VII. Claim 65, drawn to a method of using a transaminase, classified in class 435, subclass 168.

Art Unit: 1652

VIII. Claim 66, drawn to methods of identifying variant polypeptides, classified in class 435, subclass 27.

IX. Claims 88-92, drawn to a method of modifying small molecules, classified in class 435, subclass 41.

For each of inventions I-IX above, restriction to one of the following is also required under 35 USC 121.

Therefore, election is required of one of inventions I-IX and one of inventions (A)-(J).

- (A). SEQ ID No: 17, a sequence encoding thereof, or an antibody against it and methods of making and use thereof.
- (B). SEQ ID No: 18, a sequence encoding thereof, or an antibody against it and methods of making and use thereof.
- (C). SEQ ID No: 19, a sequence encoding thereof, or an antibody against it and methods of making and use thereof.
- (D). SEQ ID No: 20, a sequence encoding thereof, or an antibody against it and methods of making and use thereof.
- (E). SEQ ID No: 21, a sequence encoding thereof, or an antibody against it and methods of making and use thereof.
- (F). SEQ ID No: 22, a sequence encoding thereof, or an antibody against it and methods of making and use thereof.
- (G). SEQ ID No: 23, a sequence encoding thereof, or an antibody against it and methods of making and use thereof.
- (H). SEQ ID No: 24, a sequence encoding thereof, or an antibody against it and methods of making and use thereof.

Application/Control Number: 09/905,173 Page 4

Art Unit: 1652

(I). SEQ ID No: 35, a sequence encoding thereof, or an antibody against it and methods of making and use thereof.

(J). SEQ ID No: 39, a sequence encoding thereof, or an antibody against it and methods of making and use thereof.

The inventions are distinct, each from the other because of the following reasons:

Inventions (A)-(J) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, represent structurally different polypeptides and the polynucleotides encoding them and antibodies against them. Therefore, where structural identity is required, such as for hybridization or expression, the different sequences have different effects.

The DNA of Group I, and the proteins of Groups II and III, and the computer of Group V each comprise a chemically unrelated structure capable of separate manufacture, use and effect. The DNA comprises a nucleic acid sequence, and the proteins of Groups II and III each comprise unrelated amino acid sequences while the computer is a unrelated article of manufacture. The DNA has other utility besides encoding the proteins such as a hybridization probe, the proteins can be made by another method such as isolation from natural sources or chemical synthesis and the proteins have other utility besides acting as an antigen to induce the antibodies such as for the methods of Group III.

Art Unit: 1652

Inventions I and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)). In the instant case the product can be used to induce produce the proteins of Group II.

Inventions II and VII, VIII, or IX are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown:

(1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)). In the instant case the product can be used to induce antibodies.

Inventions V and VI are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process can be practiced by hand.

The proteins of Group II, and the antibody of Group III are unrelated to the method of Group IV as they are neither used nor made by the method of Groups IV.

Page 6

Application/Control Number: 09/905,173

Art Unit: 1652

The DNA of Group I, and the antibody of Group III are unrelated to the methods of Groups VII, VIII, and IX as they are neither used nor made by the methods of Groups VII, VIII, and IX.

The DNA of Group I, the proteins of Group II, and the antibody of Group III are unrelated to the method of Group VI as they are neither used nor made by the method of Groups VI.

The methods of Groups IV and VI-IX are independent as they comprise different steps, utilize different products and produce different results.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth Slobodyansky whose telephone number is (703) 306-3222. The examiner can normally be reached Monday through Friday from 9:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Ponnathapura Achutamurthy, can be reached at (703) 308-3804. The FAX phone number for Technology Center 1600 is (703) 308-4242.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Center receptionist whose telephone number is (703) 308-0196.
